FOR IMMEDIATE RELEASE

Free Management Services Offered For Small Businesses.

New York, NY — October 09, 2009 —The Absolute Strategies Group, LLC, a leading global strategic management consulting firm based in New York, NY announced the development of a revolutionary management system for small businesses.

"Small businesses are the foundation of our economy. The goal of our firm is to ensure that small businesses continue to experience success," stated Ankur Patel, Director of Business Development for Absolute Strategies. He went on to explain, "Managing a small business is no ordinary task. It requires attention to minor details to all aspects of the business. This can be a daunting task for any individual. Most small business owners do not possess the resources to manage a business efficiently."

Absolute Strategies breaks down small business management into five distinct areas of expertise: Legal, Marketing, Human Resources, Finance, and Information Technology.

"We lay all the groundwork to meet the needs of our clients," explained Syed Hussain, Executive Director of Absolute Strategies. "Larger organizations are successful because they have specialized management teams focusing on each of these areas. We wanted to provide small businesses with the same advantages as their larger counterparts."

Absolute Strategies provides virtual management teams to manage the tasks of small businesses. And they do this free of charge to their clients. Mr. Hussain elaborates, "We realize that small businesses do not possess the financial resources to hire the services of a management consulting firm. That is why, as a value added service, we offer free management services for all our clients. By doing so, we are confident that we are placing our firm light years ahead of the competition."
